**Subject: Information on eMasters programme of IIT Kanpur**

Dear Sir/Madam,

Indian Institute of Technology Kanpur is pleased to announce the eMasters degree programme, launched in January 2022. The eMasters programme is a senate-approved Masters degree programme of IIT Kanpur that equips working professionals with the expertise needed to stay agile and relevant in our fast-evolving tech-driven world.

The programme operates in a virtual learning environment with a flexible duration of one to three years. This dynamic platform includes online lectures, live interactive sessions, and engaging hands-on capstone projects. The courses are taught by esteemed faculty members from IIT Kanpur and adhere to the highest academic standards. The programme consists of twelve distinct modules to complete for 60 credits. Additionally, participants may have the opportunity to visit our campus, gaining access to cutting-edge laboratories and in-person classroom interactions. Upon successful completion, students have the privilege of participating in IIT Kanpur's prestigious convocation ceremony. Our eMasters graduates, numbering over 100, are making significant contributions in their respective fields, just like their fellow IIT Kanpur alumni.

For additional information about the eMasters programme, please feel free to contact us or visit the provided URL below:

eMasters website: <https://emasters.iitk.ac.in>

Warm Regards,

Shalabh
